

UNDERSTANDING YOUR COMMERCIAL BILL

Here are some explanations for the terms, abbreviations and numbers you see on your commercial bill.

1 Total Amount Due — The box at the top highlights the information you want most — the total amount due, due date and total due after the due date. Information is also on the pay stub at the bottom of the bill.

2 Meter Number — Number assigned by Bluebonnet to each meter on your account. A member may have more than one meter on their account.

3 Rate — Commercial Single Phase is your rate classification. The amount of energy your business uses determines its rate classification. Commercial single phase is typically for a small business.

4 Meter Readings — The numbers on your meter that show how many kilowatt-hours (kWh) you used during this billing cycle and determine how much you will be billed.

5 Days — The number of days in this billing period.

6 Kilowatt-hours — Unit of measurement for electricity consumed. A watt is a measurement of energy. One kilowatt equals 1,000 watts. A kilowatt-hour is the amount of electricity ten 100-watt light bulbs use in one hour.

7 Wholesale Power Cost — What Bluebonnet pays for power generated at a plant. The majority of our wholesale power, more than 86 percent, comes from the Lower Colorado River Authority. The remainder comes from other energy providers.

8 Sales tax — Some commercial members pay sales taxes imposed by the state, some cities, counties or other taxing entities.

9 13-Month Rolling Usage — Your electric use in kWh for the past 13 months.

10 Pay stub — If paying by mail, include the bottom portion of your bill.
